Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Lewis.

Lewis discloses for claim 1 a prefabricated boat comprising:

- a) a body part being composed of a plurality of division members 8 and 23 capable of being assembled;
- b) an armor part 3 for wrapping around and fixing the body part assembled into a single body; and
- c) an air tube 2 mounted on a desired position of the inner face of the armor part;
- d) wherein the armor part has the form of a bag, the armor part being provided with an opening (see figure 1) for receiving the plurality of division members constituting the body part.

For claim 2 note column 2, lines 32-35. The reinforced fibers are the fibers of the nylon fabric. The rubber makes the nylon waterproof and is the waterproof treatment.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ingram in view of Ertl et al.

Art Unit: 3617

Ingram discloses for claim 1 a prefabricated boat comprising:

- a) a body part being composed of a plurality of division members (see figures 7-9) capable of being assembled;
- b) an armor part 32 for wrapping around and fixing the body part assembled into a single body; and d) wherein the armor part has the form of a bag, the armor part being provided with an opening for receiving the plurality of division members constituting the body part.

Ingram does not disclose c) an air tube mounted on a desired position of the inner face of the armor part. Note the air tubes 1 and 2 of Ertl et al mounted on a desired position of the inner face of an armor part 4.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains to provide to Ingram an air tube similar to 1 and 2 of Ertl et al mounted on a desired position of the inner face of the armor part to tension the hull portion as taught by Ertl et al.

In Ingram the armor part 32 is further provided with a connection portion 34, which is extended from a desired position of the periphery of the opening and detachably attached to an opposite facing position of the periphery of the opening.

Allowable Subject Matter

5. Claims 4-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Koon is cited to show the collapsible foldable boat. Fleckless et al is cited to show the collapsible kayak. Szigeti is cited to show the cover of figure 3. House is cited to show the stacked boat parts and figures 3 and 4.
